

## Transglutaminase Newsletter September 2010

---

### New Catalog – Novel Products

**Dear valued customers,  
Dear transglutaminase researchers,**

We are pleased to present our up-dated product catalog expanding our range of products for transglutaminase research & development and celiac disease diagnostics including back ground information.

Please click [here](#) to download the **catalog** or send us an [e-mail](#) to receive a hard copy.

would like to highlight some new products.

### Transglutaminases

In addition to human coagulation factor XIII, the human FXIII **Val34Leu** variant, **mouse** FXIII, **rat** FXIII, **dog** FXIII and **pig** FXIII are now available.

Our range of tissue transglutaminases like human TG2, human TG2 **Cys277Ser** variant, **rat** TG2 and **mouse** TG2 is now expanded by **dog** TG2.

### Assays

For measurement of Transglutaminase 2 at protein level an **Enzyme Immuno Assay** (EIA) is now available. For activity measurement of transglutaminases you may use different **chromogenic TG2** and **factor XIII** assays completing our well established **fluorogenic kits** and **substrates**.

## Inhibitors

**Z-DON** is the most potent peptidic transglutaminase inhibitor described so far. The molecule sets the standard and is accompanied by its sister molecule **Boc-DON** and **potent small molecule inhibitors**.

For detailed information concerning our products please refer to our web site ([www.zedira.com](http://www.zedira.com)). Should you have any questions or queries about our products, please do not hesitate to contact us: [contact@zedira.com](mailto:contact@zedira.com).
