Process Change Notification

Affected Product	Polyclonal antibody to human tissue transglutaminase (TG2)
Product numbers	A014
Reason	Increase of purity.
Change description	Purification of rabbit serum using Protein A resin. Formulation in PBS buffer containing human serum albumin.
Conformity assessment	ELISA performance test of Protein A purified antibody was compared to a previous A014 lot still purified using ion exchange resin.
Measures	Purification process of A014 is changed to Protein A column chromatography and formulation in PBS, yielding higher purity and performance quality. New unit size of A014 is 200 µg/vial. This change notification is implemented on our website.
